## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/KR2004/002707

Box No.	Basis of the report
1. With othe	regard to the language, this report is based on the international application in the language in which it was filed, unless wise indicated under this item.  This report is based on translations from the original language into the following language English which is the language of a translation furnished for the purposes of:  international search (under Rules 12.3 and 23.1(b))  publication of the international application (under Rules 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)
to the	regard to the elements of the international application, this report is based on (replacement sheets which have been furnished receiving Office in response to an invitation under Article 14 are referred to in this reort as "originally filed" and are not seed to this report):  the international application as originally filed/furnished
	the description:  pages as originally filed/furnished  pages* received by this Authority on  pages* received by this Authority on
	the claims:  pages*  as originally filed/furnished pages*  pages*  as amended (together with any statment) under Article 19 pages*  received by this Authority on pages*  received by this Authority on
	the drawings:  pages as originally filed/furnished  pages* received by this Authority on  pages* received by this Authority on
3.	the sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.  The amendments have resulted in the cancellation of:  the description, pages the claims, Nos.  the drawings, sheets the sequence listing (specify):  any table(s) related to sequence listing (specify):
4.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).  the description, pages
* If i	em 4 applies, some or all of those sheets may be marked "superseded."

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/KR2004/002707

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive	e step or industrial applicability;
	citations and explanations supporting such statement	

1.	Statement			
	Novelty (N)	Claims	1 - 6	YES
		Claims		Мо
	Inventive step (IS)	Claims	1 - 6	YES
mvemive step (10)	inventive step (15)	Claims		МО
Ind	Industrial applicability (IA)	Claims	1 - 6	
		Claims		

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents.

D1: JP 02-305797 A (SANMEI DENKI KK) 19 DECEMBER 1990

D2: US 4,893,858 A (TOYOTA JIDOSHA KK) 16 JANUARY 1990

D3: JP 08-324951 A (SMITOMO HEAVY IND LTD) 10 DECEMBER 1996

D4: KR 2002-36825 A (HANCHANKI; KIMYOUNGHO; YEHAEKUM) 16 MAY 2002

The invention claimed in claim 1 is:

a lifting magnet comprising a housing; a rotary magnet unit rotatably accommodated in the housing and comprising a pair of permanent magnets having opposite magnetic poles and a rotational shaft; a stationary magnet unit comprising a pair of permanent magnets surrounding the rotary magnet unit and facing each other across the rotary magnet unit and determining a magnetization state and demagnetization state according to rotated positions of the rotary magnet unit, the lifting magnet further comprising:

a pinion coupled to the rotational shaft;

a socket moving up and down within a predetermined lifting stroke with respect to the housing;

a lifting slider comprising a toothed rack portion to be engaged with the pinion, moving up and down within the lifting stroke, and rotating the pinion to set the magnetization state at a top dead point and set the demagnetization state at a bottom dead point;

a locking part provided in one of the socket and the lifting slider;

a locking unit provided in the other of the socket and the lifting slider, comprising a locker to be locked to and released from the locking part, and lifting up and down both the socket and the lifting slider in the state that the locker is locked to the locking part; and a locking unit driver alternately driving the locking unit to release the locker from the locking part at a first lifting operation of the socket, and to lock the locker to the locking part at a second lifting operation of the socket.

#### 1. Novelty

The subject-matter of claim 1-6 is considered to be novel over the available prior art. See the section 2(inventive step) for details.

- 2. Inventive Step
- a) Independent Claim 1

The invention claimed in the claim 1 relates to a lifting magnet.

The inventions disclosed in the D1-D4 relate to lifting magnet devices.

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/002707

#### Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

#### BOX NO. V

Comparing the invention of claim 1 with those of D1-D4, the characterizing features of claim 1 is considered as this; only the socket is lifted(the lifting slider is not lifted) at a first lifting operation, however both the socket and the lifting slider are lifted together at a second lifting operation.

That is to say, only the socket is lifted up and the magnetic force is kept being turned off when the lifting magnet is lifted up from the initial state; both the socket and the lifting slider are lifted up and the magnetic force is set as the on state when the lifting magnet is lifted up again in the state that the lifting magnet is put on the steel material to be carried; both the socket and the lifting slider are lifted down and the magnetic force is set as the off state when the lifting magnet and the steel material together are lifted down.

Because none of D1-D4 teach or fairly suggest said characterizing features of the invention of claim 1, the invention claimed in claim 1 is considered to involve an inventive step.

## b) Dependent Claim 2-6

The subject matter of claims 2-6 is considered to involve an inventive step because the inventive step of independent claim 1 has been acknowledged.

### 3. Industrial Applicability

Claim 1-6, relating to a lifting magnet, are considered industrially applicable.
